

Activities, Reservations and Event Management

Your club's management systems for activities and events need to strike the right balance between functional, flexible, and easy to use – not always an easy task. Some systems have grown functionality over time through acquisition or patching up older technology, causing headaches like a disjointed or outdated interface, re-keying data or poor interoperability. A new system built from the ground up for all the needs of a modern club ensures a full feature-set in an updated, flexible, interoperable package.

Efficient Digital Management of In-Person Amenities

- **Golf Tee Times and Lottery System:**

An all-in-one system for golf tee time management and built-in lottery management streamlines the process of assigning requested tee times. Highly flexible lottery settings allow for any kind of lottery rules: membership type, peak hours, linked groups, points system, cancellation points and more. Or opt for members to reserve tee times based on open availability without the lottery. We're flexible.

- **Tennis Management and Lottery System:**

Everything you need to manage member court reservations and arrange games on multiple tennis courts. Members can request courts for a single day or multiple days for singles or doubles. Members can submit themselves for game arranging, and staff can run the lottery to arrange games between players by ranking. A display screen shows members their assigned games for the day.

- **Spa, Fitness and Salon Management System:**

A management system built specifically for country club spas, fitness centers and salons. Track all services to the member record and map services to GL charge code and member statements. Manage provider schedules and breaks, services, and vacations, and assign services to facilities available. Manage gift cards, retail inventory and POS.

- **Dining Lottery and Reservation Management System:**

Receive and assign dining reservation requests, with or without running the dining lottery. Allow members to reserve dining times by open availability, or large clubs can utilize our dining lottery to distribute reservations in a fair manner. Maintain a waiting list and assign reservations from the wait list. Automatically email members when dining reservations are requested, confirmed, and waitlisted. Reservations and their status will reflect in the member's calendar in the member app and member portal. .

Features You Need:

• Golf Management System

- Run tee time lottery, finalize, and publish the tee sheet and automatically updating members to confirm their tee time, manage group requests within the lottery, run lotteries for multiple courses at a time.
- Block courses for maintenance or tournament play
- Import from Golf Genius to bulk add players for league play.
- Receive tee time requests from Cobalt Engage module, or from third party tools
- Built-in POS for Golf Retail and tee time check-in

• Tennis Management System

- Create and manage court reservations
- Manage any number of courts
- Block courts so reservations cannot be made on that specific day/time
- Allow members to book lessons with their favorite trainers
- Build and facilitate arranged game play for your members
- Communicate court changes to members instantly through the member app
- Share tennis instructional videos directly through the member app

• Spa, Fitness and Salon Management System

- Manage appointments for members, both single and standing appointments
- Allow members to make, change or cancel appointments from the member app, or enable requests only, and call to cancel
- Save member's preferences for customized experiences
- Automate commissions and member charging through integrated POS
- Manage therapists and trainer's schedules and services available

- Built-in tablet display to allow for schedule management throughout the facility
- Integrate with accounting with services mapped to charge code
- Set up rooms and location for services provided
- Spa inventory management and retail POS

• Powerful Integration for All Modules

- All Cobalt Gather modules work with your club's management systems: pulling in member information and integrating with accounting and built-in POS
- Integrates with all Cobalt Core operations management systems
- Cobalt Integration Manager and Cobalt integration services can connect with your existing club management systems

COBALT SOFTWARE

Building a Better Club Experience by Modernizing Club Management

Cobalt Gather is a suite of club management systems powered by **Cobalt Software**. Other suites offered include **Cobalt Engage**, digital amenities such as club website, member app, and marketing tools, **Cobalt Access**, a digital amenity for temperature scanning and facial recognition time clocks, and **Cobalt Core** for back of house operations such as membership and accounting. All solutions are natively integrated with one another and can be acquired as a full platform or purchased as standalone solutions.
